

TALHA IRFAN

SOFTWARE ENGINEERING STUDENT · JAVA · OOP · DATA STRUCTURES & ALGORITHMS

Sukkur, Sindh, Pakistan · 0308 9322293 · talhairfanchoudhury@gmail.com
GitHub: github.com/TalhaIrfan-dev · LinkedIn: linkedin.com/in/talha-irfan-dev

PROFILE

Software Engineering student at **Sukkur IBA University** with a **3.77/4.00 CGPA** and hands-on experience developing Java desktop and database-driven applications. Strong foundation in **Java, Object-Oriented Programming, Data Structures & Algorithms, SQL**, and software engineering principles. Experienced with JavaFX, JDBC, MySQL, Maven, and Git/GitHub, with **Spring Boot and backend development currently being studied**. Interested in building reliable, maintainable software and applying strong engineering fundamentals to real-world systems.

EDUCATION

Sukkur IBA University — Sukkur, Pakistan

Bachelor of Science in Software Engineering · 2024 – 2028 · Current CGPA: 3.77 / 4.00

Relevant Coursework: Object-Oriented Programming · Data Structures & Algorithms · Database Systems · Software Construction · Software Quality Engineering · Software Requirements Engineering · Web Engineering · Software Design & Architecture

TECHNICAL SKILLS

LANGUAGES	Java, C++, SQL, HTML, CSS, JavaScript
JAVA / BACKEND	JavaFX, Java Swing, JDBC, Maven, Spring Boot (currently learning)
DATABASES	MySQL, Relational Database Design, CRUD Operations
CORE	OOP, Data Structures & Algorithms, Software Design, UML, Software Testing, Problem Solving
TOOLS	Git, GitHub, IntelliJ IDEA, VS Code

PROJECTS

JavaFX Web Browser

Java · JavaFX · JDBC · MySQL · Maven · Data Structures

- Developed a desktop web browser using Java and JavaFX, applying object-oriented design and fundamental data structures.
- Implemented **Stack, Queue, and Doubly Linked List** structures for browser navigation, browsing history, and bookmark management.
- Built multi-tab browsing, user management, session handling, search, bookmarks, and history functionality.
- Integrated **MySQL through JDBC** for persistent user, bookmark, and browsing-history data.
- Structured the application into modular components with reusable classes and JavaFX/FXML-based interfaces.

GitHub: github.com/TalhaIrfan-dev/Javafx-web-browser

AutoDeal Management System

Java · Java Swing · JDBC · MySQL · OOP

- Developed a Java-based automobile dealership management system using object-oriented programming principles.
- Implemented customer management, vehicle inventory, and sales/deal management functionality.
- Designed a graphical interface using Java Swing and connected the application to MySQL through JDBC.
- Applied modular class design and database CRUD operations for persistent application data.

GitHub: github.com/TalhaIrfan-dev/AutoDeal-Management-System

Vehicle Management & Renting System

C++ · File Handling · Data Management

- Developed a console-based vehicle management and rental system using C++.
- Implemented vehicle inventory and customer rental operations.
- Used file handling for persistent application data and applied structured programming and problem-solving concepts.

GitHub: github.com/TalhaIrfan-dev/Vehicle-Management-and-Renting-System

Luxury Car Showroom Website

HTML · CSS · JavaScript

- Developed a responsive car showroom website with interactive vehicle showcases and modern UI components.
- Implemented frontend structure, styling, and JavaScript-based interactivity.

GitHub: github.com/TalhaIrfan-dev/luxury-car-showroom-website

CERTIFICATIONS & ACTIVITIES

- **Building Coding Agents with Tool Execution** — DeepLearning.AI, 2026
- **Introduction to Git and GitHub** — Google, 2026
- **ChatGPT Prompt Engineering for Developers** — DeepLearning.AI, 2025
- **Google AI Essentials** — Google, 2025
- **Programming Competition** — Sukkur IBA University, 2025
- **Introduction to Figma** — Simplilearn, 2024

INTERESTS

Software Engineering · Java & Backend Development · Data Structures & Algorithms · Database Systems · Artificial Intelligence · Open Source Development
